Personal Statement

Self-taught Junior Developer with full-stack experience in PHP, Perl, JavaScript, and React. Skilled in building internal tools and automating backend workflows atop the Vicidial platform in a high-volume call center. Proficient in writing Perl CLI scripts for ETL and integrating with platforms like Salesforce, Quickbase, and Boberdoo. Comfortable managing Linux servers, Apache, MySQL, and VoIP infrastructure. Contribute to HR systems including time tracking, payroll, and hiring tools. Focused on scalable, maintainable solutions that reduce manual work.

Work Experience

Junior Developer
Iconic Results
Sep 2024 – present | Phoenix
- Built CLI tools in Rust and Perl to automate ETL and lead processing for Vicidal integration.
- Developed and maintained internal web apps using PHP, Laravel, React and jQuery on top of Vicidial
- Integrated platforms like Salesforce, Quickbase, Boberdoo via custom REST APIs and webhooks.
- Created custom MySQL reports and automated data workflows using Perl scripts, cron jobs, and Windows Task Scheduler.
- Led development of an internal documentation portal using Docusaurus to streamline onboarding and system references.

Logistics Technician II (Contractor)
Apple
Apr 2024 – Sep 2024 | Mesa
- Decommisioning server assets in compliance with environmental regulations.
- Utilizing Linux servers to securely wipe hard drives and verify successful data erasure.
